Subject: Microsoft Settlement

I am very concerned that this settlement has gone on for nearly four years and may still be at risk of not being resolved in a timely manner. I have been involved in the Information Technology industry since 1981 and have seen significant advances and innovations over the years from all major vendors such as SUN, Oracle and Microsoft. I have also seen technology help advance large enterprises, governments, health and industries in such fashion to enable them to increase productivity, decrease operating expenses, increase partner interactions and improve corporate America. More importantly Information Technology has made a very positive impact on the economy in North America and abroad. However; this legal case has severely impacted many businesses and people around the world by diverting our attention to brace for major un-necessary changes to one of the key players in the industry (Microsoft). This case needs to be resolved quickly and fairly so we can "Get on with business" and begin to focus our attentions on stimulating the economy back to normal in a very different America.

I have read the latest settlement and I believe it is fair and reasonable to all parties involved and I am looking forward to a final settlement in a timely manner.

Andrew Morrissey, I.S.P.
